

COVID-19 SCHOOL BUS CLEANING PROCEDURES

It is important that our children and staff remain as safe as possible during such a crucial time in our society. This pandemic has taken a toll on families across globe. As we enter into the school reopening phase, we here at Putney Transportation have implemented cleaning procedures to keep children and staff as safe as possible when riding with us. Below are the cleaning procedures every bus must undergo:

- -Each bus is disinfected before and after each trip.
- -Each high touch area is disinfected; seats, railings, windows, and top luggage compartment if bus is equipped with one.
- -Floors are swept and mopped thoroughly.
- -The driver cockpit is given proper cleaning and disinfected including seat, control panel, and steering wheel.
- -A sanitizing mist is applied to the entire cabin, including those hard to reach areas.
- -As a bonus, masks are made available in each bus, mounted by the entrance door for any passengers who may have forgotten theirs.
- -Also, hand sanitizers are mounted in the front entrance of each bus for passenger use when entering and exiting our buses.
